

扶輪標誌

於 1905 年為芝加哥扶輪社所設計，以馬車輪為代表，於 1912 年國際年會時，正式以有齒輪的圖案作扶輪社標誌，1921 年再設計成今日採用之標誌。

Rotary Emblem

First designed in 1905 by Rotary International, Chicago, the carriage wheel with six spokes, 24 cogs and a key way was chosen as the pattern then. And it was not until Rotary International Annual Meeting 1912 that the image of a gear-wheel became the symbol of Rotary International. The present design was actually settled in the year of 1921.
